

CREATING DURABLE FUTURES

WITH PRECISION ENGINEERING
FOR HIGH QUALITY
WAREHOUSE

- **Faster :**
time to rent
- **Longer :**
building life
- **Larger :**
space with smart design
- **Higher :**
return on investment

CREATING
DURABLE FUTURES

TRUSTED COATED STEEL BRANDS

Zincalume® | Colorbond® | SuperDyma® | SuperDyma® CRP

Superior durability and warranty offering

For general logistics & warehouses

For cold chain warehouses

When warehouse needs are met

Leak resistance & minimal maintenance

Optimal space

Flexibility in design and aesthetics

Clean interior

High energy efficiency

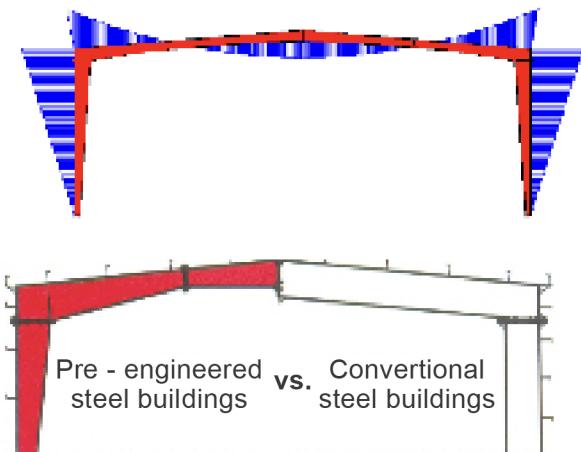

Customized canopy space
for efficient loading platforms.

PROBUILD®

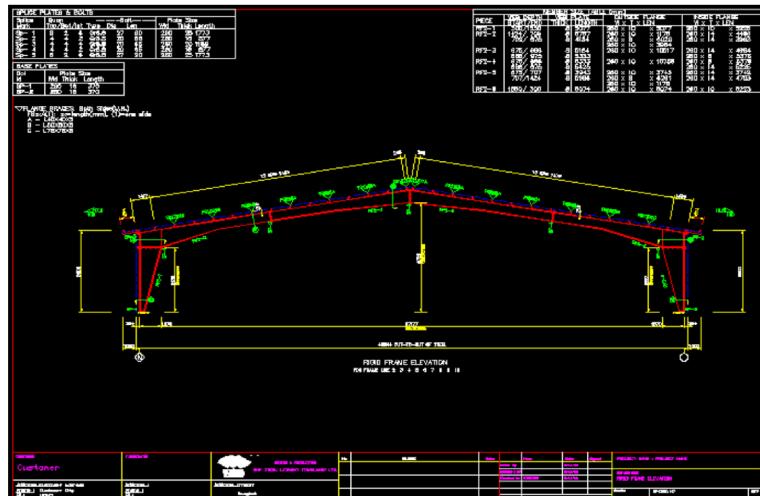

Customized and high quality design solutions
for modern logistics

 Speed  Space  Sustainability

PROBUILD® is steel building solutions, pre-engineered design and pre-fabrication. Constructed by "KNOCK-DOWN" (PEB) system.

Pre - engineered
steel buildings **vs.** Conventional
steel buildings

SPEED

Faster construction time

LARGE CLEAR SPAN

Allow for future modification

FLEXIBILITY

Canopy wide span for loading and unloading efficiency

INTEGRATION WITH ROOFING & CLADDING

Compatible building envelope solutions

COST EFFICIENCY

Lower overall costs

DURABILITY

Corrosion & color warranties

PROBUILD® : COMPONENT SYSTEM

The complete solution for durable, fast to build, and exceptional long-term value warehouse

Our component system
integrate materials from BlueScope for

Maximum
durability

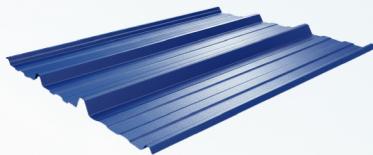

Strength
and speed

Aesthetics
and protection

Core component	BlueScope product	Key benefits	Warranty offering	
			Shall not perforation due to corrosion	Color fading and chalking
Roof & wall	Colorbond®	Premium color-coated steel that is beautiful, durable, and exceptionally strong even in harsh weather.	up to 35 years	up to 12 years
	Zincalume®	Zincalume® steel for maximum corrosion protection.	up to 25 years	N/A
	SuperDyma® CRP	SuperDyma® CRP for areas demanding hygiene or high moisture (food grade pre-painted, corrosion-resistant coated steel).	up to 15 years	up to 5 years
Secondary structural & frame (purlin & girt)	SuperDyma®	High strength SuperDyma® with superior corrosion resistance with warranty compared to conventional GI providing longer span for secondary framing design.	Structural failure due to corrosion up to 12 years

ROOF AND PANEL SYSTEMS:

Customize building develop
to meet your operating requirements and comfort

Roof with boltless system

Zincalume® | Colorbond®

Topic	Benefit
Watertight & leak prevention	<ul style="list-style-type: none"> - Concealed fixing with clips (no screw penetration) ensures long-term watertight performance. - On-site roll forming can minimize sheet lapping.
Efficient installation	Reduces human error and time from installation.
High durability with proven quality	<ul style="list-style-type: none"> - COLORBOND® and ZINCALUME® steel are made to last with rigorous tests method to ensure best-in-class durability. - COLORBOND® ULTRA steel also available and designed specifically for marine and industrial environments.
Comfort & efficiency	THERMATECH® technology in COLORBOND® steel and insulation system optimize heat reflection for thermal efficiency.
Lightweight & structural advantage	Lighter roof reduces building load, improves safety, and ease of installation.
Long lasting color & low maintenance	<ul style="list-style-type: none"> - Advanced paint technology in COLORBOND® steel delivers proven enduring colors, durability, and long life performance. - Clean Technology in COLORBOND® steel offers rain-washable surface to resist dirt buildup and therefore maintains a clean look over time.
Flexibility for add-ons	Ideal for solar panel installation and other rooftop equipment.

Sandwich panel

Colorbond®
SuperDyma® CRP

Criteria	Benefit
Thermal & energy efficiency	Excellent insulation reduces heat transfer, keeps indoor temperature stable, and lowers energy consumption for cooling.
Fast & easy installation	Prefabricated modular panels allow quick installation, reducing overall project construction time.
High strength & durability	Made with COLORBOND® steel and ZINCALUME® steel for superior corrosion resistance and long service life under warehouse conditions.
Aesthetic & flexible design	Variety of colors with a touch of premium finish and various thickness options provide design flexibility for modern warehouses.
Hygiene & low maintenance	Zilicon-Shield™ technology in SuperDyma® CRP offers easy-to-clean surface from water protection and oil repelling qualities along with integration of antibacterial technology making it even more suitable for clean room application.
Green building material	Recyclable steel materials support eco-friendly practices and eligible to increase LEED and TREES certification points.
